March 30, 2010

Welcome to the March 30 CorasWorks Community Update. Spring has sprung! And, not a minute too early. Shed those memories of dark, cold, and snow and allow us to shed some fresh spring light on many of the great things happening at CorasWorks.

News and Events

- **Webcast: Project Portfolio Management (PPM)** - We can't stop the PPM momentum. Due to popular demand, we've scheduled another PPM webcast for 2pm EDT, Wednesday, April 7. If you haven't seen PPM, the new sync capability with MS Project, or PPM Mobile, [sign up for the webcast and check it out](#).
- **CorasWorks Training** - CorasWorks has a full complement of product training courses. We're offering training the week of April 12 at our Reston, VA, facility. [Check out the available courses and register online](#).

Community Highlights

Remember to Login to see all information and access contributor features. [Click here if new to community](#).

Applications

- **Work Order Approval (CorasWorks)** - Work Order Approval is a classic business process app. Submit, track, approve, and report on your work orders, all driven by email notifications. Work Order Approval is also a perfect example of the types of business process apps you can build with CorasWorks. [See it now](#).
- **Plug-and-Play Displays** - In addition to our business apps, we have plenty of "pieces" that can be dropped in to any site and used immediately. Drop in our [Event Calendar](#) for a color-coded look at your events. Use [Tasks with Conditional Stoplight](#) for classic red/yellow/green functionality. Or, get a view of who's contributing information to any site with the [Workspace Activity Reporter](#).

Resources

- **Video: Distributing App Functionality** - In our March 18 edition, we highlighted the [Time Off Management application](#) from R3 Business Solutions. This edition, we'll use the Time Off app to demonstrate how you use Snaplets to distribute functionality across your SharePoint Environment. Click to access the 7-minute video "[How to Distribute Snaplets - Time Off Management App](#)."
- **Video: Localization** - Did you know you can customize your CorasWorks displays from the default English language to other languages? Access the [video in our Learning Center](#) to make CorasWorks truly global.

Blogs & Forums

- [William's Blog: Preview of Spirit Micro-community v1.2 for SharePoint](#) - This blog entry includes a video and screenshots previewing the upcoming new micro-community module of the Spirit Community Services Suite v1.2.
- [From the Field: App Design Tip... Filter By Groups I Belong To \(and more\)](#) - We've heard the request tons of times; can I not assign items to a Group but get a filtered view of all items assigned to Groups I'm a member of? We've got the answer. [Click to read more](#).
